

# Bottle Bird Feeder

## What you will need:

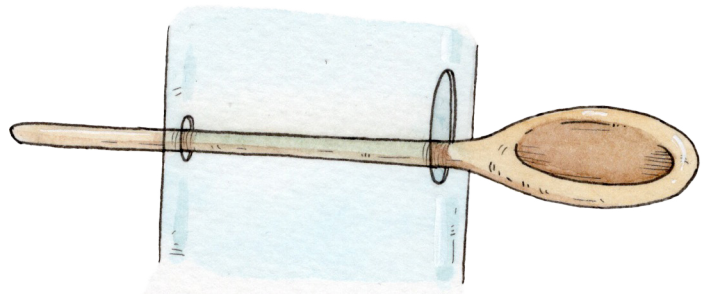

Some wooden spoons, A plastic bottle, string, some scissors and some bird food

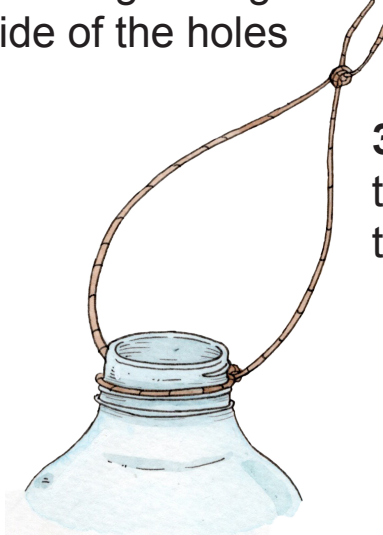

**1)** Firstly, take bottle and with the help of an adult cut one, two three holes the size of the spoon handle either side depending on how many spoons you have.

one at the top, then the middle and one nearer the bottom. Make one sides holes a little bigger than the other, this is so the food can come out.

**2)** Now push your wooden spoons into position, with the handle pushing through and out the other side of the holes

**3)** Using your string, tightly tie it around the neck of the bottle with a double knot. Add a loop by tying together the two ends with another knot.

**4)** Now we can add our scrumptious food for the birds, pop the lid on nice and tight and it's ready for the garden.

**5)** As an extra you could paint and decorate your spoons and bottle but always make sure it is safe for the not something they might mistake for food
